WORK EXPERIENCE:

Promega – Fitchburg, Wisconsin

Quality Assurance Intern, May 2023 – August 2024

- Assisted Promega's internal audit team with external audits
- Modify and create procedures, forms, and records necessary for the quality system team
- Support development of record systems and maintain them to meet quality system requirements
- Increase document control productivity by 150%

Promega – Fitchburg, Wisconsin

Package Associate, April 2021 – May 2022

- Label and package components accurately
- Accurate documentation of necessary paperwork
- Pull supply of flat stock from pallet and assemble them into boxfolds for use in packaging operations

Relevant Coursework:

- Intro to Artificial Intelligence
- Intro to Algorithms
- Mobile Systems and Applications
- Virtual Reality
- Building User Interfaces

PROJECTS:

154tattoo.com – HTML, CSS, JS, React

- Use HTML, CSS, JS, and React to create a tattoo artist's portfolio
- Used to book over 100 tattoo appointments a month
- Gained experience working with a client to develop and design a website that matched their desired aesthetics and requirements.

BuckyGrades.com – Python, JS, HTML, CSS, React, Firebase

- Use the above languages and tools to create a course search for all UW – Madison courses
- Collaborate with a group using agile methodologies to meet project deadlines
- Gained experience working with large amounts of data via JSON files
- Implemented various search functionalities to better serve UW – Madison students during course enrollment

MichaelWeb.com – HTML, CSS, JS, Next.js, TypeScript

- Created a personal coder portfolio
- Used Figma to create a Bento Box UI Design which I implemented using the languages above

ACTIVITIES:

IHOP, International House of Programmers – Co-Founder

WSUM, Wisconsin Student Radio Station
